

NeoCheck Changelog

NeoCheck v3.28.5

Smarter verification insights and platform maturity

What's new

- Advanced verification insights with enhanced data breakdowns
- Extended API fields for deeper integration and analytics

Improvements

- Improved platform scalability under high-load scenarios
 - Ongoing stability and performance optimizations
-

NeoCheck v3.28.4

Enhanced analytics and monitoring

What's new

- New monitoring capabilities for verification performance
- Additional analytics metrics available via API

Improvements

- Improved system observability
 - Minor fixes and optimizations
-

NeoCheck v3.28.3

Greater automation and decision-making capabilities

What's new

- Enhanced automation rules for verification workflows
- Additional webhook event types for granular integrations

Improvements

- Faster processing times for complex verifications
 - Improved reliability in asynchronous operations
-

NeoCheck v3.28.2

Improved workflow flexibility

What's new

- Additional configuration options for verification pipelines
- Improved conditional logic in workflows

Improvements

- More efficient execution of multi-step processes
 - Minor fixes
-

NeoCheck v3.28.1

Refined user experience and integration flexibility

What's new

- Improved configuration options for verification flows
- Extended support for third-party integrations

Improvements

- UI responsiveness improvements
 - Minor bug fixes and performance tuning
-

NeoCheck v3.28

Next-level orchestration and control

What's new

- Centralized workflow orchestration for identity verification processes
- Enhanced rule-based decision engine

Improvements

- Better performance in multi-step verification scenarios
 - Improved API consistency and documentation alignment
-

NeoCheck v3.27.5

Operational visibility improvements

What's new

- Enhanced dashboards for operational monitoring
- Additional logs for troubleshooting and support

Improvements

- Faster issue detection and resolution
- Minor fixes

NeoCheck v3.27.4

Enhanced fraud detection and monitoring

What's new

- Real-time fraud monitoring enhancements
- Additional fraud signals integrated into verification results

Improvements

- Increased detection accuracy for suspicious behaviors
 - Minor fixes and optimizations
-

NeoCheck v3.27.3

Improved verification accuracy

What's new

- Refinements in biometric and document validation processes

Improvements

- Higher precision in identity matching
 - Minor fixes
-

NeoCheck v3.27.2

Improved compliance and reporting

What's new

- Expanded compliance reporting capabilities
- Additional audit data available via API

Improvements

- Optimized report generation performance
 - Minor fixes
-

NeoCheck v3.27.1

Stability and reliability improvements

Improvements

- Increased platform stability

- Backend optimizations
 - Minor fixes
-

NeoCheck v3.27

Stronger compliance and auditability

What's new

- Enhanced audit trail visibility across all verification processes
- Improved compliance-ready data structures

Improvements

- Increased system reliability
 - Performance improvements in reporting modules
-

NeoCheck v3.26.3

Better integration and data handling

What's new

- Extended API support for custom data fields
- Improved handling of edge cases in verification flows

Improvements

- Faster API response times
 - Minor fixes
-

NeoCheck v3.26.2

Processing efficiency improvements

Improvements

- Optimized verification processing pipelines
 - Reduced latency in high-volume scenarios
 - Minor fixes
-

NeoCheck v3.26.1

Stability and performance enhancements

Improvements

- Improved system stability
 - Backend optimizations for verification processing
-

NeoCheck v3.26

More flexible and scalable integrations

What's new

- Improved API flexibility for complex integration scenarios
- Enhanced support for multi-tenant environments

Improvements

- Better performance in high-volume operations
 - Minor fixes
-

NeoCheck v3.25.7

More robust and transparent platform

What's new

- Enriched API responses with additional verification data
- Clearer and more actionable error messages

Improvements

- Improved overall system stability
 - Continuous UX enhancements
-

NeoCheck v3.25.6

Incremental improvements and stability

Improvements

- Minor bug fixes
 - Performance tuning
-

NeoCheck v3.25.5

Continuous optimization

Improvements

- Enhanced API logging
 - Minor performance improvements
-

NeoCheck v3.25.4

System reliability improvements

Improvements

- Stability improvements across verification services
 - Minor fixes
-

NeoCheck v3.25.3

Improved validation processes

What's new

- Additional validation checks for document authenticity

Improvements

- Minor fixes
-

NeoCheck v3.25.2

Performance tuning

Improvements

- Backend optimizations
 - Reduced response times
-

NeoCheck v3.25.1

Stability improvements

Improvements

- Minor fixes and system stability enhancements
-

NeoCheck v3.25

Real-time visibility and control

What's new

- Real-time tracking of verification status
- Enhanced sandbox environment for testing integrations

Improvements

- More reliable webhook delivery system
-

NeoCheck v3.24

Flexible, business-oriented reporting

What's new

- Customizable reporting templates
- JSON export support

Improvements

- Advanced filtering and pagination in API
-

NeoCheck v3.23

Advanced fraud prevention

What's new

- Device fingerprinting
- IP-based geolocation validation

Improvements

- Enhanced fraud detection rules engine
-

NeoCheck v3.22

More robust video identification

What's new

- Downloadable video identification session recordings
- Verification retry capability via API

Improvements

- Increased video session stability
-

NeoCheck v3.21

Intelligent risk management

What's new

- Risk scoring system for verifications
- Configurable verification workflows

Improvements

- Better performance with large datasets
-

NeoCheck v3.20

Innovation in digital identity verification

What's new

- NFC reading for electronic identity documents (eID)
- Enriched verification metadata available via API

Improvements

- Improved OCR accuracy for documents
-

NeoCheck v3.19

Scalability and stronger compliance

What's new

- Bulk verification processing
- Expanded control lists (PEP, sanctions, etc.)

Improvements

- More accurate matching algorithms
-

NeoCheck v3.18

Global experience and enhanced security

What's new

- Multi-language support in verification results
- Advanced document fraud detection indicators

Improvements

- Improved liveness detection accuracy
-

NeoCheck v3.17

Advanced automation and integrations

What's new

- Asynchronous verification processing via API
- Webhook notifications for real-time status updates

Improvements

- Reduced latency in API responses
-

NeoCheck v3.16

Greater control and traceability

What's new

- User action audit logs for compliance and traceability
- Configurable biometric similarity thresholds

Improvements

- Enhanced data export and reporting structure
-

NeoCheck v3.15

More complete document verification

What's new

- Automatic document expiration validation
- Extended support for additional document types

Improvements

- Increased facial biometric accuracy
 - Overall performance optimizations
-

NeoCheck v3.14

Enhanced control for video identification and reporting

What's new

- New configuration options for video identification
- Control list filters in CSV reports

Improvements

- General fixes and optimizations

User Experience

- Fixed control list update issue
- Minor UI improvements

NeoCheck v3.13

Improved biometrics and risk filtering

What's new

- Gender filter in control lists
- Liveness detection in biometric results

Improvements

- Improved navigation between verification flows

User Experience

- Fixed international prefix issue
- Minor UI improvements
